Mark Strynar has attached the following document:

ZW_2016_feature_7July2016_CPH.docx

All,

I read the document and really liked the message. Unfortunately I have come to the decision that having me as a co-author on this document would likely diffuse and delay the message as written. If I am a co-author the US EPA would need to clear this paper and I am afraid that would cause too much delay and grief. I am sorry it has taken up to now for me to tell you this. I like Chris suggestion for Jamie to be added as a co-author. I am glad to be acknowledged as a editor of this document if you deem that okay. If not am am glad to remain anonymous.

I have edited it and added suggestions where I thought they were appropriate. Please consider these suggestions. I am going to send a separate email with a couple of references I thought could be added.

Please let me know if you can see my edits. I am working on this document on Google Docs from the version Chris sent out and I want to be sure the suggestions are visible to you.

Sincerely,
Mark
